

# Sample Business Report

## Executive Summary

This is a sample business report demonstrating various content types that can be extracted and converted to Excel format. The document contains tables, lists, headers, and paragraphs to test the intelligent content detection system.

## Financial Data

Month	Revenue	Expenses	Profit	Growth %
January	\$125,000	\$85,000	\$40,000	12.5%
February	\$138,000	\$92,000	\$46,000	15.0%
March	\$142,000	\$88,000	\$54,000	17.4%
April	\$156,000	\$95,000	\$61,000	13.0%
May	\$168,000	\$102,000	\$66,000	7.7%

## Key Performance Indicators

- Customer satisfaction rate: 94.2%
- Employee retention: 87%
- Market share growth: 3.2%
- Product quality score: 9.1/10
- Operational efficiency: 92%

## Department Performance

Department	Budget	Actual	Variance	Status
Sales	\$500,000	\$485,000	-\$15,000	Under
Marketing	\$200,000	\$210,000	+\$10,000	Over
R&D	\$300,000	\$295,000	-\$5,000	Under
Operations	\$150,000	\$148,000	-\$2,000	Under
HR	\$100,000	\$102,000	+\$2,000	Over

## Conclusion

This sample document demonstrates the capability of the PDF to Excel converter to handle various content types including tables, lists, headers, and paragraphs. The converter should be able to intelligently detect and organize this content into separate Excel sheets for better analysis and reporting.
